

GF-902 | GOOSENECK MICROPHONE

Description

GF-902 is a locking three pin balanced XLR female microphone microphone rod, which can firmly lock the base of the conference microphone to prevent various failures caused by looseness or poor contact. It has LED ring indicator light ring, which can tell the working state of the microphone through the light and dark of the light ring. FI shielding technology can effectively suppress external RF interference.

Product Specification

Microphone Type:	Condenser Supercardioid
Frequency Response:	50Hz-20KHz
Sensitivity:	-20dB +/-3dB(0dB=1V/Pa,f=1KHz)
Maximum input sound pressure level:	125dB(THD < 1%, f=1KHz)
Signal-to-noise ratio (A-weighted):	>100dBA
Distortion:	<0.1%
Power Supply:	24V DC (provided by the host)
Power Consumption:	0.72W
Unit Interface:	RJ45 network port
Dimensions (mm):	285(L)
Weight:	About 180g
Color:	Metallic gray
